**L**abelRIGHT™ Ultimate for Windows® is the latest version of our popular bar code printing software and offers the most powerful labeling program available at any price. With many new features and powerful tools this new version prints faster than other Windows bar coding programs! Design any format, any size label; add graphics, bar codes, lines or boxes - the possibilities are endless!

- Unlimited fields per label
- Scalable fonts 3-375 points
- Over 25 Bar Code Types
- Print directly from Excel® worksheet
- Any format or size label
- New Thermal Transfer Support
- Any number of columns and rows
- Advanced Serialization
- Multiple bar code densities
- Design in Metric or Inches
- Variable Line and Box thickness
- Portrait or Landscape Printing
- Import graphic image files JPEG TIFF
- Export to PDF, TIFF, JPEG BMP
- Import ASCII TXT CSV & DBF data files
- BarFont™ Tools Included
- Page overlay for catalog formats
- Windows® Vista, XP, ME, 2000, NT, 98SE
- Complete Package - \$299 (Single User)
- NET Client Server Version - \$999

*"In short, your product is outstanding!...With no knowledge of the software I had a template developed within 2 hours...I'm sold on your product and your company."*

**John G. Walker**  
Director Sales Systems

See our website for information on our Worth Poly™ Polyester Laser Label Stock - you won't find a more durable label!

Our Full Featured Graphical Interface

### Applications include:

- shelf, shipping, pallet, and storage labels
- name tags, ID Badges, catalogs
- route accounting sheets
- custom scanning menus for job cost or test reporting
- eye readability at several hundred feet

### Special industry formats furnished:

- MIL-STD 129P & 130M
- Automobile Industry Action Group  
AIAG B-5 Primary Metals  
AIAG B-3 Shipping Parts/Identification  
Ford, GM, Chrysler, Caterpillar, etc.  
AIAG B-2 Vehicle Identification  
AIAG B-2 Unit Packaging  
AIAG B10 specifications  
GM 1724
- AT&T, AMP, TRW
- Odette
- HIBCC
- Chrysler unit labels
- KMart, Penney's, Sears standards

### Bar codes supported are:

- Code 39 and Full ASCII Code 39
- Code 128, Code 93, MSI, I 2 of 5
- UPC-A, UPC-E, EAN-8, EAN-13
- GS1-128, UCC/EAN-128 SCC & SSCC
- Zip+4, Codabar, GS1 DataBar (RSS14)
- PDF 417, Data Matrix, MaxiCode
- ISBN, ISSN, MSI

Bar codes can be printed from .1" tall to 6.9" tall. Up to 5 bar code densities can be selected, complying with most known bar coding standards.

### Design Interface

The design interface takes full advantage of Windows® facilities to give you a viewable label on the screen as you design it with pull down menus. Lines, boxes, rotations, and multiple bar code densities are easily specified. Tools for page overlay, grids, tabs, cut, paste, copy, undo, zoom, and a field status line all make the label design powerful but simple. The entire manual is online for help. Very complex labels can be quickly and easily designed and then saved to disk for later retrieval.

### Outstanding Font Support

You can print labels with fully scalable text from 3 to 375 points in height (that's over 5 inches high!) in landscape or portrait orientation.

Any font you have installed with Windows® can be used with LabelRIGHT; plus, LabelRIGHT comes with TrueType and Postscript bar code fonts and OCR fonts. Text fonts can be rotated in any orientation from 0-360 degrees.

Bar code fonts can be printed at 0, 90, 180, and 270 degree rotations. You can mix different rotations on the same label. Bar code fonts are optimized for Thermal Transfer, Lasers, Dot Matrix, and Inkjet printers.

Laser fonts are optimized for 300, 600 and 1200 dpi. Thermal Transfer Fonts are optimized for 203 and 600 dpi. Using these optimized fonts, you can't print out-of-spec bar codes. Font installation and downloading is automatic.

### Simple Custom Operator Interface

Using LabelPROMPTS™, the label designer can create a simple operator interface program in which the operator answers a series of simple questions. Labels are then printed automatically. There is also a powerful Excel® database sorting tool for complex label management.

### Printing Images

For logos, product images, and warning symbols, LabelRIGHT includes the ability to import and print a variety of graphic image file types including JPEG, EPS, TIFF, BMP, and PNG.

### All Sizes of Label Stock

LabelRIGHT allows formatting one label in the top left corner that can be horizontally and vertically replicated, creating an entire page of labels from one label definition. Each individual label can vary in data content with auto-incremented data, or data read from an ASCII text file or data brought in from an Excel® worksheet.

### Data File Input

Data to be printed can be specified on the label design screen or data can be entered from a ASCII text file created by such applications as Word, Write, Notepad, Excel, Access, etc., or even downloaded from your mainframe. ASCII TXT and CSV file input is supported.

### Print labels directly from Excel®

LabelRIGHT offers the ability to print straight from your Excel® spreadsheet! Simply design your label template in LabelRIGHT, then go to your worksheet in Excel® and link up the columns to the corresponding fields on your label - you can even specify different quantities for each label from within your worksheet!

### Exporting Images

LabelRIGHT also can export an image file of your label design. This can be used for print proofs and high quality artwork export. Supported formats include: PDF, JPEG, TIFF, BMP, and PNG.

### BarFont™ Tools

Our BarFont™ Tools are also included to allow the use of the bar code fonts that come with LabelRIGHT to be used in other applications like Word®, Photoshop®, Illustrator® etc...

### Required Hardware/Software

Intel® Pentium® compatible CPU Running Windows® Vista®, XP, 2000, NT, ME, or 98, 256MB RAM (512MB recommended for Vista and XP), 40 MB of free hard disk space, CD-ROM Drive, & 800x600 16-bit color display.

LabelRIGHT's Single User Software is licensed for one user to use on one CPU. Persons, or companies, with multiple CPU's (including network users), who use multiple copies of this program must purchase that many corresponding licenses of the software. The LabelRIGHT NET Client/Server Software License is valid for one Server CPU only, with multiple Clients in the same organization on unlimited CPU's. Persons, or companies, with multiple physical locations or those who need multiple copies of the Server version must purchase that many corresponding licenses
